

N2200

Your iDEAL Home NAS

Status At-a-Glance

How is your NAS doing today? With its colorful liquid crystal display, you can monitor your N2200 at all times simply by looking at the intuitive status icons.

Easy to Set Up, Easy to Use

Network Attached Storage (NAS) is an IP storage device connected to a computer network. The advantages of Thecus® NAS are to provide data storage management with protection and file sharing functions to other devices across the network. NAS offers other diverse applications and features. High tech shouldn't mean high difficulty. The N2200 can be set up and installed in a snap and even features Thecus' brand-new AJAX-based web interface for complete ease-of-use. One-click USB copy button allows effortless and instant file transfer from external USB disk to N2200.

Enterprise-Class Data Protection At Home

With RAID 0, 1, and JBOD, you can choose the level of speed and protection you want from the N2200. And with auto-rebuild and hot swapping, changing hard disks couldn't be easier. To backup your data, Thecus' backup utility and Nsync remote replication are also included.

Rich and Friendly Multimedia Features

Designed for home use, the N2200 packs some useful features under the hood, including an iTunes server, a photo web server, and a media server (DLNA/uPnP compatible). Sony's Playstation 3TM and other DLNA certified digital media players can automatically discover and stream content instantly from the N2200. The most praised download manager (with http, FTP, BT, and eMule download features) on the N2200 brings low power and stable downloading instead of using regular PC. You can even use the N2200 as a simple surveillance server by plugging in a compatible USB web cam or IP cam!

Quietly Saving Money

As low as 11w, leaving it on 24/7 does not cost much at all. A perfect replacement for PC right at home. Its intelligent power-saving design means lower overall operating costs. Saving money and green storage server for the planet. What's more, with system fan that automatically spins down when the system is idle, the N2200 is a quiet worker. It is so silent that you won't notice its presence.
